

RODEO STARS... Roy Rogers, "King of the Cowboys," will star in the Sheriff's Championship Rodeo at the Los Angeles Memorial Coliseum Sunday afternoon, August 22, and Ann Sheridan, alluring film beauty, will reign over festivities of the day as "Queen of the Rodeo." The nation's top cowhands will compete for prizes in broncho and wild Brahma bull riding, and proceeds will go to the Sheriff's Relief Association.

Retail Prices in Local Area Below Average

The Torrance-Lomita area has had a lower rate of increase in average retail prices since the base years of 1935-1939 than any of the 16 largest cities in the United States surveyed in June, with the exception of Boston. This was disclosed this week by the U. S. Department of Labor.

The "all items" classification of the price index for Los Angeles was on the decline for the second consecutive month with an index of 168.8 for June, while May registered 169.1. The base years of 1935-1939 are assigned an index of 100.

Index figures for food and miscellaneous items also dropped during June. May's indexes of 212.6 and 146.5 respectively were revised to 212.1 and 146.3 in June. Apparel continued to climb however, according to the summary, from an index of 195.8 in May of this year to 196.2 for June.

Production worker employment in manufacturing industries in June was 3,300 above May and 2,100 higher than June of 1947. Retail trade employment was increased by 3,500 during the period May to June. The latest figure in this classification is 10,600 above the same period last year.

RIVIERA SCHOOL SITE

The newest proposed elementary school site to serve the Hollywood Riviera district lies wholly inside the Ellinwood Ranch and does not involve any property in Tract 10304, according to the tract owners. It abuts Tract 10304 but does not actually include any of the tract.

New Sunburn Aid, But You Pronounce It!

"Super" sunburn lotions and ointments can be made from compounds recently tested by scientists in the University of California College of Pharmacy. Dr. Warren D. Kummer, associate professor of chemistry and Dr. Troy Daniels, dean of the college, reported that the new compounds are two to eight times more effective than commonly used compounds in screening out the ultraviolet rays which cause sunburn.

Delay Slough Area Sewers

Hearing of protests on installation of sewers in the district within the boundaries of East Road, Main Road, Carson street and the slough in the Dominguez area were continued to Aug. 28 at 10 a.m. by the Board of Supervisors Tuesday.

Carnegie Ups Price 9 Pct.

Carnegie-Illinois Steel Corporation, subsidiary of United States Steel, announced new mill prices at which its stainless steel products may be purchased at its plants, effective as of last Monday.

It is estimated that the average price increase will be approximately 9 1/2 percent over prices which have been in effect since April, 1946.

College Will Get Initial Plans Under 'Pay-As-You-Go' Program

Plans for the first group of permanent buildings for El Camino College will be available for inspection at the meeting of the college's board of trustees next Tuesday, Aug. 24, it was disclosed this week by President Forrest Murdock.

All construction work at El Camino, Murdock emphasized, is being done under a five-year "pay-as-you-go" through tax money voted by the college district last year. By 1953 the district expects to have a \$2,000,000 campus without any bonded debt.

First permanent buildings scheduled are the women's gym building near the southerly edge of the campus and the shop building on the north. Athletic facilities for both men and women—football field, track, tennis and basketball courts, also are scheduled for the first year.

Scheduled to get under way next month are parking lots for an additional 400 to 500 automobiles. These additional lots will be provided to the east and west of the present parking area, which will double the surfaced areas before the winter rainy season begins. Eventually, the area now occupied by the college's temporary buildings will be given over to parking lots and lawn.

Construction probably will begin this winter on the large athletic stadium, which will dominate the westerly 40 acres of the campus where the other athletic facilities will be installed. Only 1000 seats will be installed as the first step, utilizing the large mound of earth familiarly known as "Mount Wimmer" as backing for the seats.

The stadium, which will ultimately seat 20,000 and be available for public events, will cost \$42,000 complete, and will be built this year out of the college's own funds in lieu of paying the county \$81,000 as the purchase price of its 81-acre campus and having the county erect the stadium and \$39,000 worth of other facilities including a baseball diamond, 10 tennis courts, volleyball, basketball and handball courts and install a springing system.
